

# The power of prototyping

As easy as sketching – as powerful as written code.

### Be faster

With Pidoco you can get working simulations of a website or mobile app in front of decision makers or customers within hours – without any coding.

### Be safer

Pidoco lets you test drive your software before implementation so you can catch mistakes, correct poor specifications and get things right the first time.

### Be better

Outperform your competition by testing your products early and delivering a superior user experience. Impress your audience – every time!

#### Your benefits

- ✓ Cut development cost by up to 30%
- ✓ Speed up development by up to 50%
- ✓ Boost customer satisfaction and usability
- ✓ Model web and mobile applications
- ✓ Simplify collaboration
- ✓ No programming required

# About Pidoco

With its real-time collaborative prototyping software, award-winning Pidoco GmbH helps big and small companies in over 50 countries optimize their software development processes. By using Pidoco's software visualization capabilities for modelling and testing their web or mobile applications prior to implementation, businesses can save costs, reduce project risks and ensure customer satisfaction.

### Trusted by:

#### Five reasons to get Pidoco

- ✓ Easy to use
- ✓ Easy to get started
- ✓ Easy to get results
- ✓ Easy to collaborate
- ✓ Easy to scale

#### Security

With SSL encryption, professional hosting, a physical firewall and daily backups, your data is safe.

# CREATE

*Don't complicate!*

# Powerful Prototyping

Pidoco is the ideal prototyping solution for smart businesses. Pidoco lets you quickly model interactive web or mobile applications and simulate them directly on target devices to help you present ideas, identify usability issues and document requirements. Experience Pidoco's powerful modelling and collaboration features today!

## Interactivity

Interactive components bring ideas to life and improve communication with developers, clients and management – all without any programming.

## Mobility

With our apps you can simulate and test interactive prototypes in real-time directly on tablets and smartphones without any downloads or installation.

## Exports

PDF and RTF exports allow you to generate specification documents with one mouse click. You can also export prototypes as images (SVG, PNG) or HTML files.

*"It is really great to have 'working' prototypes on the iPad to show around and gather feedback."*

Andreas Bleiker, User Experience Expert, Roche Global IT

*"With Pidoco we go through development more than 50% faster than we used to."*

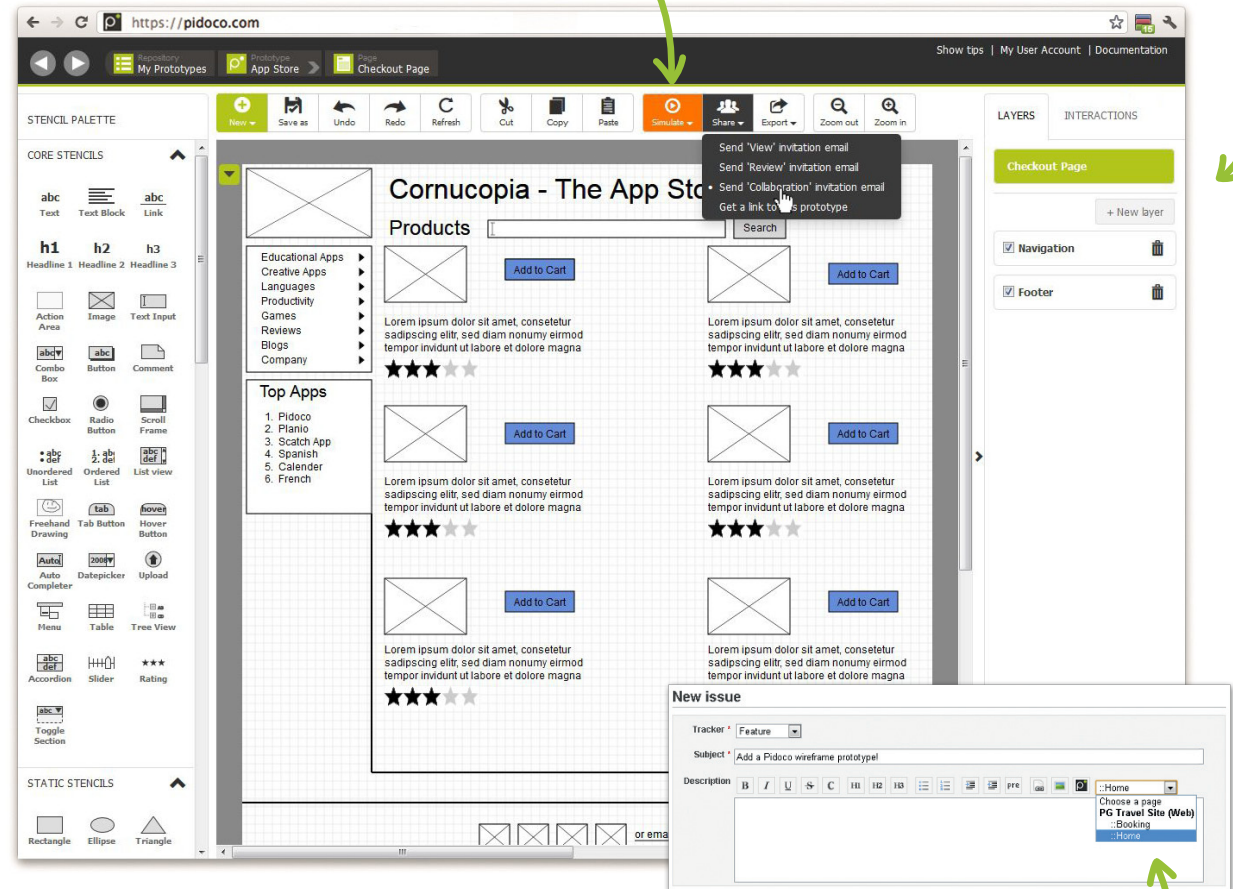

Sven Eßbach, Head of Operations, Unimall

## Collaboration

With smart collaboration and team functions you can share and edit your projects online with others, easily collect feedback and track change requests.

## Templates

In Pidoco you can create custom templates as building blocks for your prototypes to save valuable time in your projects.

## Usability

Our drag & drop feature makes Pidoco very easy to use and quick to learn. This ensures an easy roll-out to your entire organization.

## Integration

With Pidoco's REST API you can use prototypes directly in wikis, bug tracking, requirements and project management systems.
